

Announcing SimForce

Connecting leadership and frontline in one app

Launch on 27-Sep-2025

Meet SimForce — Your Workforce, Unified

SimForce brings your entire workforce together on a single mobile platform. It doesn't just streamline workflows — it transforms them into informed, goal-directed actions. By connecting leadership and frontline in real time, SimForce ensures every task contributes meaningfully to your organization's shared business goals.

What SimForce Delivers

SimForce is an **AI-native workforce orchestration platform** that unifies critical business functions — leave and attendance, approvals and delegation, field operations, verification, and analytics and more — across mobile and web. With enterprise-grade passkey security and built-in compliance, it's designed for trust, scale, and performance.

🌟 Implement it all, or choose the modules that matter most — SimForce adapts to your priorities.

Run Your Business on SimForce

- **Leads & CRM** — Capture, qualify, and grow pipelines with context from day one.
 - **Quick Applications** — Frictionless loan and liability onboarding with product-aware validation.
 - **Approvals & Delegation** — Policy-driven routing, safe delegation, and controlled rollouts.
 - **Leave & Attendance** — AI-assisted validation, fairness controls, and audit-ready trails.
 - **Tasks & Field Execution** — Route-aware tasking, collections, verification, and mobile-first execution.
 - **Documents & Verification** — Structured templates, role-aware reviews, and vendor compliance.
 - **Document Collection** — Ensure every required document is captured, every time.
 - **Roles & Authorization** — Granular roles, hierarchical org views, and policy-based access.
 - **Dashboards & Insights** — Team and branch metrics, trends, and exportable reports.
-

Why SimForce Stands Apart

- **AI where it matters** — explainable decisions, risk signals, and impact scoring.
 - **Enterprise-grade passkeys (FIDO2/WebAuthn)** — seamless security across iOS, Android, and Web.
 - **Mobile-first delegation & approvals** — safe, progressive feature rollouts with confidence.
 - **BFSI-ready controls** — mandatory leave, SoD, escalation SLAs, immutable history.
 - **Real-time fabric** — presence, approvals, and workflows powered by WebSockets.
 - **Open & scalable** — K8s-ready, observable, and built for horizontal growth.
-

Outcomes You Can Measure

- **2× faster leave decisions** with AI pre-validation and smart routing.
 - **85–92% approval prediction accuracy** proven in internal testing.
 - **<2s validation latency** for responsive user experiences.
 - **100% audit-trail coverage** across approvals, delegation, and critical actions.
-

General Availability

- **Early Access** — Pilot AI-enhanced Leave & Workforce modules with assisted rollout, rule tuning, and security review.
 - **Go-Live Support** — Playbooks, admin training, success metrics, and optional white-glove deployment.
